Terratungsten: Excellence in Agricultural Machinery Parts Production

Welcome to the exciting universe of Terratungsten - the industry leader specializing in designing and manufacturing high-quality parts for agricultural machinery. Our relentless pursuit of innovation, technological excellence, and commitment to agriculture has earned us recognition and trust from customers all around the world.

TerraTungsTen - Sintered Carbides

Terratungsten is a company specializing in the design and production of replacement parts for agricultural machinery. We utilize sintered carbide technology, where the hardening layer and carbide inserts significantly enhance the strength and durability of our products. This advanced technology provides highly efficient and resistant parts, ensuring optimal tool utilization even in the most extreme soil conditions.

The use of tungsten carbide in critical areas ensures the preservation of part geometry and construction, guaranteeing optimal performance throughout the entire operational lifespan. This material minimizes smearing and allows for soil cutting instead of compacting, effectively reducing compaction and providing drainage exactly where needed.

You're welcome to visit
our website.

01 Plow parts 06

HARDFACING

An additional hardening coating, with a hardness ranging from 62 to 70 HRC

- Ensures consistent geometry over an extended period
- It provides a longer lifespan
- Enhances wear resistance

INDUCTION BRAZING OF CARBIDE

The application of tungsten carbide in critical areas preserves the geometry and structures of parts, ensuring optimal performance throughout their operational lifespan.

TERRA STRONG

A line of products made as forgings, characterized by the afore-mentioned hardness coefficient within the range of 45-55 HRC. Reinforced with hardfacing and sintered carbide.

TERRA STANDARD

A product line made from C45 steel, reinforced with hardfacing and sintered carbide.

TERRA WELD

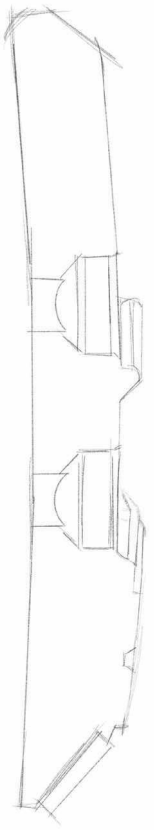

A product line made from boron steel reinforced with hardfacing.

terra parts™

A product line dedicated to machines used for sugar beet harvesting.

Terra TungsTen

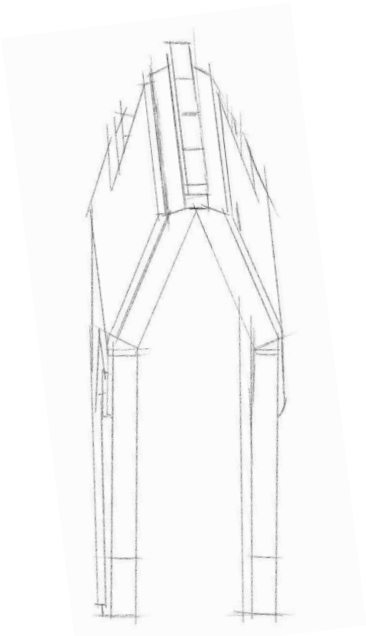

is the assurance of reducing wear and tear - we present the Terra Strong product line.

Thanks to it, you can enjoy numerous technical and economic benefits, such as maintaining sharp edges, reducing wear, and saving on parts. Our components are carefully designed for deep-seated use.

TerraTungsTen cultivator points

are synonymous with exceptional quality and extraordinary durability, achieved through the use of advanced technology.

Our products stand out with parts reinforced with hardened coatings and made from sintered carbide. These innovative solutions not only ensure resistance to wear but also provide long-lasting usability of our cultivator points. TerraTungsten guarantees that in agricultural operations, you can rely on the highest standard.

TERRA WELD

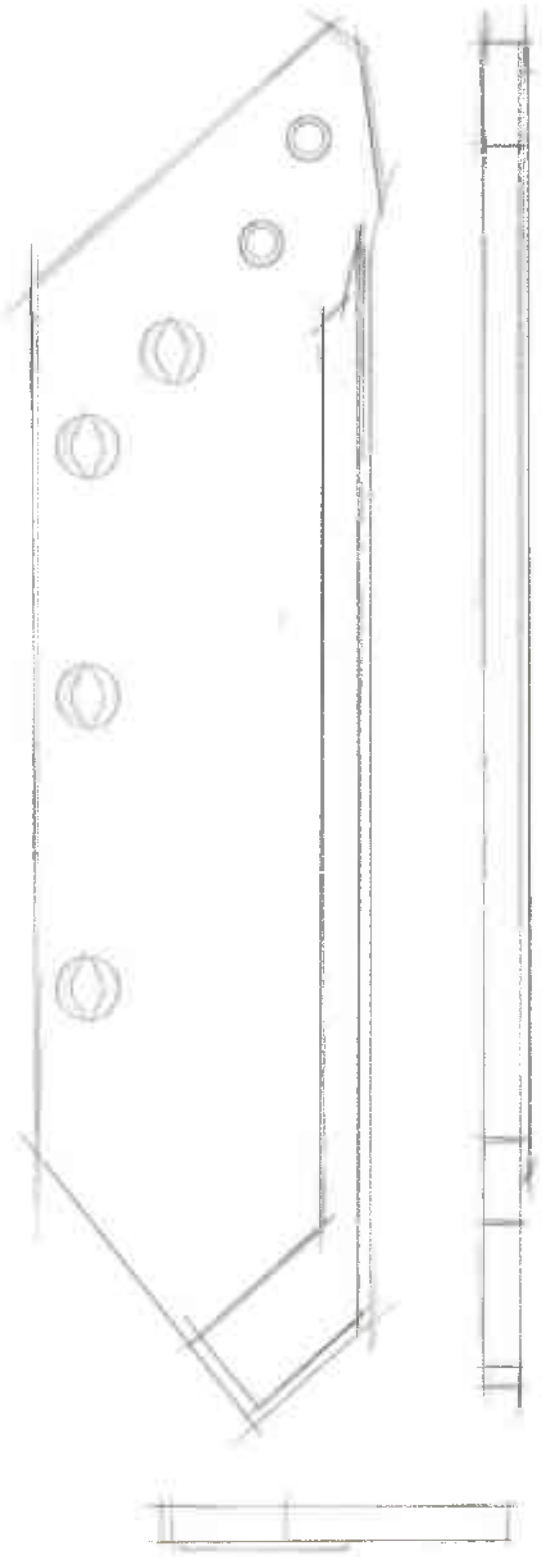

156 Terra Weld

The Terra Weld product line
is a series of exceptional products created by Terra TungsTen company.

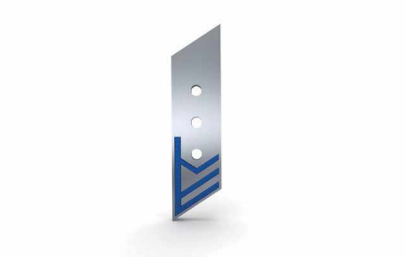

These products are made from high-quality C45 steel, which has been reinforced using a special hardfacing technique. Thanks to this process, the steel becomes more resistant to wear and tear, making Terra Weld products incredibly durable and resilient.

WELCOME AND EXPLORE THE ALL-NEW TERRA TUNGSTEN CATALOG!

We invite you to discover our latest collection of high-quality tungsten products.
Whether you're in need of precision tools or industrial solutions,
Terra Tungsten has you covered.
Dive into our catalog and experience the world of excellence in tungsten.
Your journey begins here!

Terra TungsTen

We operate throughout Europe.
